

## PROJECT RELATED MOTIVATION LETTER

(Please specify project, name, date)

Project Code: <b>VJF 1.1</b>	Project Name: <b>Nature Lovers 1</b>	Start <b>29/08/2022</b>	End <b>11/09/2022</b>
---------------------------------	---	----------------------------	--------------------------

First Name: Diana Ivet	Surname: Ramírez Becerra
Gender: Feminine	Date of Birth: 25/03
Mobile Number: 477813556	E-mail: ramirezbecerraid@gmail.com

### Brief introduction to yourself:

My name is Diana Ramírez, I am 22 years old, I am from México, I am looking to volunteer because I would like to discover new cultures, nature, food and places, share a bit of my country. I am currently studying a career in computer systems engineering, after finishing this career I consider studying another related to chemistry, I am a person who likes to undertake, learn new things, self-taught, responsible, and social.

### Why you chose this specific project and why you are interested in it?:

I chose this specific project because I like so much the nature, I think If we understand how important, complex, and wonderful nature is, it will be much easier to interact and take care of it, since we are part of it. And what better way to know, is to put our attention and senses in wanting to explore in a forest full of nature. The contemplation of beauty causes us positive feelings and acts as therapy to improve our mood. When we talk about conserving nature, we are really talking about taking care of our future, because nature provides essential resources for our survival and enjoyment.

### The reasons why you think are a good candidate for this position (your background and experience, if any):

I think I am a good candidate for this project because: When I was little, I liked to go with my grandmother because she had a ranch with animals, I liked to feed them and take care of them, I also had many fruit trees and plants, I liked to water them and cut the plants that were already dry and clean the garden. Having plants is in the family, my mother currently has a house full of plants and a garden which I water every day.

### How you think you can contribute to the project:

I can contribute taking care of the nature and wildlife of the Wolfsburg Urban Forest, I can help in all moment, because I really like stay in contact with the nature, I believe that I can make many things here like monitoring that the people not disturb the fauna and flora of the forest, I can care the clean of the green zones, I can contribute by protecting, preserving and restoring biodiversity.

I would like to express my gratitude for your attention.
